Engineered Products

Operating Company	Products	How they are helping
	<p>Manufacturing Manual and Power Clamps, Pneumatic Grippers, Indexers and Conveyors, End Effectors, Remote Handling Products (CRL) such as Telemanipulators, Glove Ports, Transfer Ports, Beta Bags, Hot Cells, Isolators and Glove Boxes.</p>	<p>These products are used in the following markets: Food and Consumer Goods, Paper Products, Pharmaceutical production, Pharmaceutical research (CRL), Medical Devices, Electronics and Other Critical Manufacturing Industries.</p>
	<p>Heil manufactures Refuse Collection Bodies.</p> <hr/> <p>Marathon manufactures commercial compactors and recycling balers.</p> <hr/> <p>3rd Eye manufactures vehicle-born cameras, collision-avoidance radar – and digital gateways.</p> <hr/> <p>Soft-Pak manufactures critical back-office software and in-cab computing systems.</p>	<p>These products are vital in removing municipal waste from neighborhoods and businesses.</p> <hr/> <p>These products compact the trash created at hospitals, apartment complexes, critical retail outlets and waste hauling facilities.</p> <hr/> <p>These products provide critical video and data analytics that assist refuse fleets manage their assets and provide safety systems for Refuse Collection System operators.</p> <hr/> <p>These products assist Refuse Collection Vehicle fleet managers and operators to better navigate their refuse collection routes and the information generated while on route – which are processed via Soft-Pak’s back-office systems.</p>
	<p>Manufacturing RF & Microwave products.</p>	<p>We provide essential components that enable reliable secure communications to the Defense, Aerospace and Space Markets. Providing secure signals allows the military to execute commands, first responders to reach essential people and satellite communication to broadcast news.</p>
	<p>Manufacturing benchtop soldering and dispensing products.</p>	<p>Our products are vital to the manufacturing and assembly of electronics for medical devices, military and aerospace.</p>
	<p>Manufacturing and servicing products to support numerous U.S Military and Defense industry programs, as well as a number of other industries.</p>	<p>We are providing our products to industries that the Cybersecurity and Infrastructure Security Agency has determined to be critical infrastructure.</p>
	<p>Shipping vehicle lifts and service parts.</p>	<p>Our products are assisting the essential industries of automotive/truck/bus repair and public transportation remain operational to serve the greater population.</p>

Fueling Solutions

Operating Company	Products	How they are helping
	Manufacturing Fueling equipment, components and services.	Our products support energy, transportation, and the ongoing operation of local gas stations.
	OPW - Retail Fueling manufactures both above ground and below ground products for the retail fueling industry.	Our products help first responders and essential employees get to the places we need them to be.
	OPW - Fluid Transfer Solutions manufactures fluid handling equipment.	Our products help to safely transport important chemicals and petroleum that keep essential businesses running.

Imaging & Identification

Operating Company	Products	How they are helping
	JK Group manufactures digital inks.	Our inks are used in the printing of textiles being used for reusable safety masks
	MS Printing Solutions designs, manufactures and distributes digital inkjet printing systems.	Our printers are used in textile printing, including printing of reusable safety masks.
	Manufacturing various types of industrial printers, product ID and traceability solutions.	These products allow food, beverage, pharmaceutical and personal goods industries (essential goods) to comply with regulations and provide consumers and suppliers with key data, such as product expiration dates and batch numbers.

Refrigeration & Food Equipment

Operating Company	Products	How they are helping
	Manufacturing Machinery and Spare Parts for the production of metal beverage packaging.	Our products are assisting in the supply chain continuity for the beverage industry.
	Manufacturing equipment, parts and services.	Supporting the needs of food retail, convenience store and industrial food storage customers by providing equipment, parts and services to help them continue to operate.
	Manufacturing heat exchangers.	Heat exchangers are a crucial component for essential and critical systems: <ul style="list-style-type: none"> • Production, transport, storage and selling points related to the food chain. • Temperature control systems in healthcare infrastructure & pharma production. • Cooling of servers and data centers. • Emergency power generators for hospitals.
	Manufacturing Refrigeration, Cooking, Warewash, Ventilation, and Meal Delivery equipment.	Our products support restaurants, hospitals, supermarkets and many other customers to provide food to their employees and the general public.

Pumps & Process Solutions

Operating Company	Products	How they are helping
	<p>Manufacturing a wide range of medical and biopharma products.</p>	<p>Our products are used in the manufacture of critical medical equipment, such as ventilators, respirators and hospital beds and support surfaces, as well as products that facilitate the testing and manufacture of vaccines and drugs.</p>
	<p>Inpro/Seal manufactures bearing and product seals.</p>	<p>Our products keep equipment operating in critical industries, including energy, food, beverage and paper.</p>
	<p>Cook Compression manufactures and services components for reciprocating compressors.</p>	<p>Our products are critical to the oil & gas sector as well as chemical and petrochemical processing.</p>
	<p>Waukesha Bearings manufactures fluid film bearings and magnetic bearing systems.</p>	<p>Our products are manufactured for critical equipment in power generation, oil & gas, chemical processing, HVAC, marine and defense industries.</p>
	<p>Bearings Plus manufactures and repairs fluid film bearings to keep equipment operating in power generation and the oil & gas sector.</p>	<p>The power industry is responsible for providing power to places like hospitals, research centers and pharmaceutical companies, in addition to residential homes.</p>
	<p>Manufacturing pelletizers and pulverizers used in the production of plastics.</p>	<p>Our products help customers produce plastics used in food and medical markets, including packaging and safety masks that are made from non-woven materials.</p>
	<p>Hydro Systems produces dosing and dispensing products.</p>	<p>We enable our partners to provide cleaning and disinfectant solutions needed around the globe.</p>
	<p>Quattroflow manufactures quaternary diaphragm pumps designed for critical applications in the biopharma as well as food and beverage industries.</p>	<p>Our pumps aid in the creation of new vaccines and medications and are critical for chemical processing applications.</p>
	<p>Abaque, All-Flo, Almatec, EnviroGear, Griswold, Neptune and Wilden manufacture a variety of positive displacement pumps.</p>	<p>We provide solutions that enable operations in chemical facilities for sanitization products, water and wastewater treatment, crop fertilization and irrigation, paper production for toiletries, and food and beverage.</p>
	<p>Blackmer and Ebsray manufacture sliding vane pumps and gas compressors.</p>	<p>We provide critical solutions in oil and gas transfer, chemical processing, and military applications. All of which aid in providing safety, production of critical materials, and uninterrupted energy services for homes and businesses.</p>
	<p>Mouvex manufactures a variety of pumps, compressors and metering systems.</p>	<p>Our products are critical for the transport and production of food, beverage and hygienic products.</p>
